The Little Things That Make Health Better

“ In this edition, we're focusing on small but powerful changes that can make a big difference in your health.

From keeping track of your check-ups with the Health Bank Book to staying active with our first-ever senior gym exercise program (SilverSneakers, in joint partnership with Believe fitness), we're making it easier than ever to prioritize your well-being.

On top of our commitment to one-stop rehab and post-discharge service support, we're also introducing new rental homecare bed solutions, ensuring that everyone receives better support, a smoother recovery, and greater comfort at home, most importantly at an affordable cost.

At Alpro Silvercare, our mission is simple: help every senior to live strong, and enjoy every moment. We're here with you. ”

Have you ever:

- ✗ *Lost reports & forgot test results?*
- ✗ *Can't remember the next check-up date?*
- ✗ *Unsure which health tests you've done?*

Are You

Struggling

To Keep Up With Health Screenings?

If this sounds familiar, you're not alone. Many seniors face the same struggle. Health screenings are important, but keeping track of them can feel like a hassle.

But what if there was a simple way to record everything in one place, so you never have to worry about missing a test or losing your reports again?

Meet The Health Bank Book

Your Personal Health Tracker

The **Health Bank Book** is your **all-in-one health record**, designed to make life easier for seniors.

Think of it as your personal **health passport**, where all your important test results are stored—**organized, easy to track, and yours to keep for 5 years!**

- ✓ **Never misplace reports.**
- ✓ **Know your next check-up.**
- ✓ **Track your progress easily.**
- ✓ **FREE for seniors 55 & above!**

Why You Need It & How It Works

Who Needs the Health Bank Book?

Caregivers

Helping parents track their check-ups.

Independent Seniors

No more forgetting health reports.

Health-Conscious Individuals

Stay on top of your health progress.

Fun Fact:

Why Is the Book So Big?

Isn't It "Mafan" (Troublesome) to Carry?

- ✓ **Larger Text**
The bigger size means bigger words, so seniors don't have to struggle to read small fonts. No more squinting!
- ✓ **One Book for 5 Years**
Instead of keeping scattered papers and separate records, everything is in one place—a full 5-year record of your health check-ups and progress.
- ✓ **You Don't Have to Carry It All the Time**
Just bring it when you go for your scheduled check-ups, get your health results jotted down, and that's it!

*All your health rewards, progress, and records—kept safe in just one book!
Every senior should have a Health Bank Book!*

Important Health Tests For Every Seniors

Blood Pressure Monitoring
Helps manage heart health.

Body Mass Index (BMI) Check
Supports healthy weight maintenance.

Muscle Strength Test
Prevents falls & fractures.

Memory Assessment
Detects early dementia signs.

Ear & Hearing Check
Prevents isolation & cognitive decline.

Vision Health Screening
Reduces risk of falls & injuries.

Bone Density Test
Prevents osteoporosis complications.

Annual Blood Test
Early detection of chronic diseases.

Must-Have Senior Vaccinations

As we age, our immune system weakens.

- ✓ **Flu Vaccine (Yearly)**
Prevents severe flu complications.
- ✓ **Shingles Vaccine (Once-in-a-lifetime)**
Prevents “kayap” (shingles), which causes painful blisters and long-term nerve pain.
- ✓ **Pneumococcal Vaccine (one-time or in two doses, depending on age and health conditions)**
Shields against pneumonia, Malaysia’s leading cause of death since 2023, with up to 75% protection.

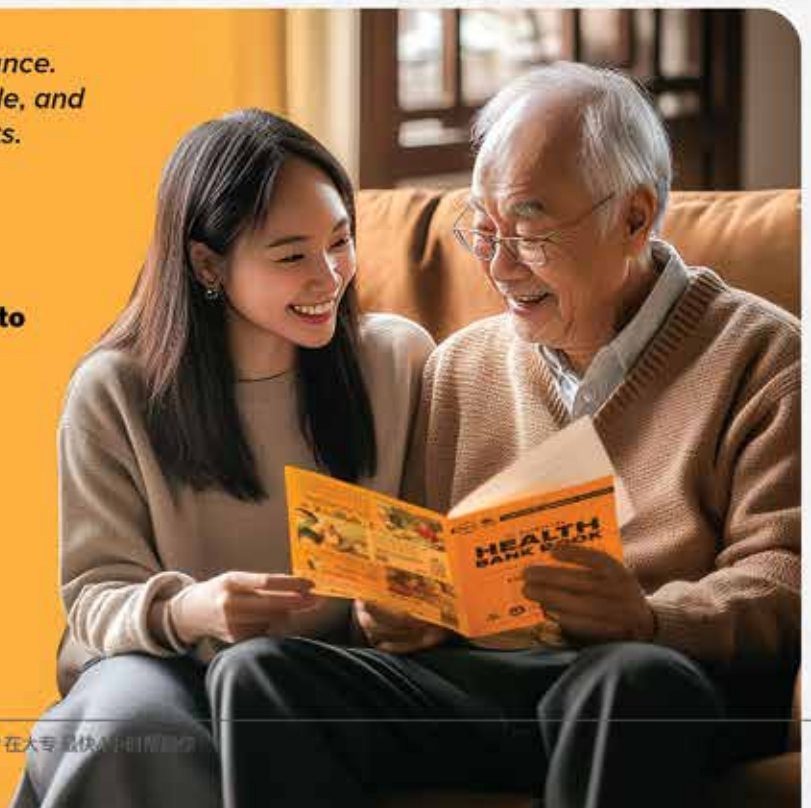

Note: Some tests are only available in selected regions—contact us for details!

It’s okay, I don’t need it?

Your health is too important to leave to chance. The Health Bank Book makes it easy, simple, and stress-free to keep track of your health tests.

FREE for seniors aged 55 & above!

Prepared by:
Ms. Pearly, Physiotherapist

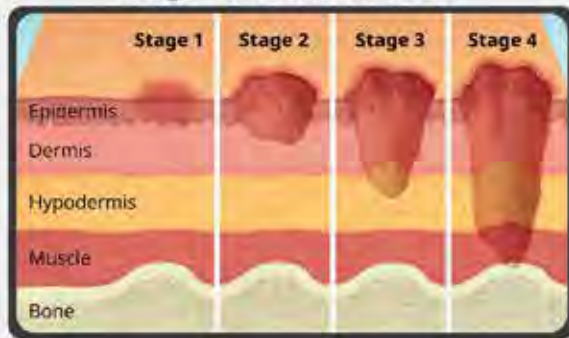

What Are Pressure Ulcers?

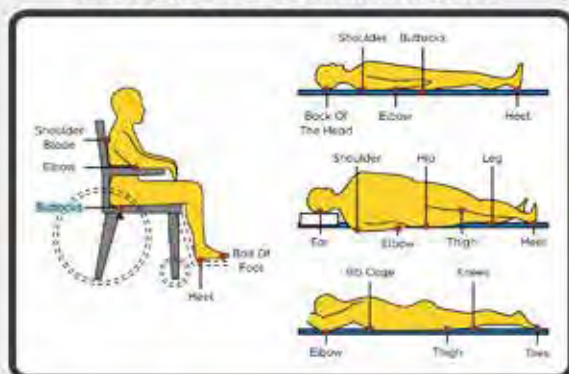

Pressure ulcers, or bedsores occur due to prolonged pressure, shearing force or friction in the same region, causing reduced blood flow to your skin.

Lacking blood flow can cause the skin cells to die in as fast as 2 hours! As the dead cells break down, a pressure ulcer injury form.

Stage Of Pressure Ulcer

Pressure Ulcer Common Sites

Pressure Ulcers: Symptoms and Risk Factors

Pressure ulcers, commonly known as bedsores, occur when sustained pressure on the skin reduces blood flow. Here's what you need to know.

Symptoms to Be Aware Of:

- **Skin Changes:** *Unusual color or texture.*
- **Swelling:** *May indicate problems.*
- **Drainage:** *Pus-like fluid.*
- **Temperature Changes:** *Cooler or warmer areas.*
- **Tender Spots:** *Sensitive areas.*

Who is at Risk?

Individuals at higher risk include:

- **Older Adults:** *Skinny*
- **Bedridden Individuals:** *Limited mobility.*
- **Comatose Patients:** *Unable to move.*
- **People with Paralysis:** *Difficulty shifting positions.*
- **Frequent Wheelchair Users:** *Prolonged sitting.*
- **Those with Casts or Splints:** *Increased pressure points.*

Recognizing these signs and understanding risk factors can help prevent pressure ulcers.

Pressure Ulcer Prevention

The first step in preventing pressure ulcers is to reduce the pressure and friction that can cause them. Here are some effective methods:

1. **Use Support Surfaces:** Utilize special mattresses, beds, or cushions that help protect fragile skin while sitting or lying down.
2. **Maintain Good Hygiene:** Moisture from sweat, urine, or feces can weaken the skin and increase the risk of sores. Use highly absorbent diapers, keep the skin dry and clean, and regularly check for redness at pressure points.
3. **Reposition Regularly:** Change the patient's position every two hours to relieve pressure. Additional cushions or special devices can help alleviate pressure points.
4. **Ensure Adequate Protein Intake:** Proper nutrition, especially protein, is essential for healthy skin and speeding up wound healing.

Patient repositioning can be done in different ways, such as:

Is there a better alternative to strenuous manual repositioning? **Yes!**

Manual repositioning can be exhausting and time-consuming for caregivers, and it raises the risk of lower back injuries if proper handling techniques are not used.

Worried About Pressure Ulcers?

Why It Matters?

Pressure ulcers can lead to serious infections, costing time and money to heal.

Discover the Ripple Mattress:

Your Solution For Pressure Ulcers

The ripple mattress is here to help! This innovative air mattress uses alternating pressure to relieve pressure points and prevent sores.

Choosing the Right Ripple Mattress

Here's how to select the best one:

- **Define Your Goal:** *Prevention or treatment?*
- **Check Weight Capacity:** *Ensure it supports your needs.*
- **Prioritize Safety:** *Look for safety certifications.*

EXTRA TIPS ABOUT DIAPER

3 Features That A Good Diaper Should Have :

1

Wetness Indicator
Let you know it may be
time for a diaper change.

2

Leak Guard Protection System
Provide leakage protection even with
frequent movement.

3

Good Absorbency
For excellent absorption capacity and
fluid retention to maintain the dryness.

DO NOT FORGET TO PREPARE!

Diaper Cream
To protect the
skin from urine
irritation.

Underpad
To protect the
bedsheet from
wetting due to
urine leakage.

Protect Your Loved Ones From Pressure Injuries: **PREVENTION IS KEY!**

By : Ph Soo Fern

Who Is at Risk?

Would you rather struggle with a hard-to-heal wound that takes weeks or even months to recover, or prevent it from happening in the first place?

Bedridden or wheelchair-bound patients

Patients recovering from surgery

Individuals with reduces mobility

Those with neurological conditions affecting movement

To prevent pressure injuries, frequent repositioning, proper nutrition, and daily skin inspections remain essential. In addition, **multilayered soft silicone foam dressings** provide extra protection, especially over bony prominences, reducing the risk of skin breakdown.^{[1],[2]}

1. Int Wound J. 2013 May. A RCT of the effectiveness of soft silicone multi-layered foam dressings in the prevention of sacral and heel pressure ulcers in trauma and critically ill patients. 27;12(3):302-308. doi: 10.1111/ijw.12101

2. Int Wound J. 2024: A systemic review and meta-analysis of the efficacy of sacral foam dressing in preventing sacral pressure injury. <https://doi.org/10.1111/ijw.14673>

An Easy, Effective Prevention Plan

To optimize protection, integrate silicone foam dressings into routine care strategies alongside:

Regular repositioning schedules

Proper skin care & hygiene

Adequate nutrition & hydration

Why Choose MULTILAYER SILICONE FOAM?

Silicone foam dressings offer several key benefits in preventing pressure injuries:

EVEN PRESSURE DISTRIBUTION

Reduces shear and friction in high-risk areas like the sacrum, heels, and elbows.

CUSHIONING & COMFORT

Provides a soft, breathable barrier that minimises mechanical stress on the skin.

MAINTAINS A MOIST WOUND ENVIRONMENT

Prevents skin breakdown and slows injury progression.

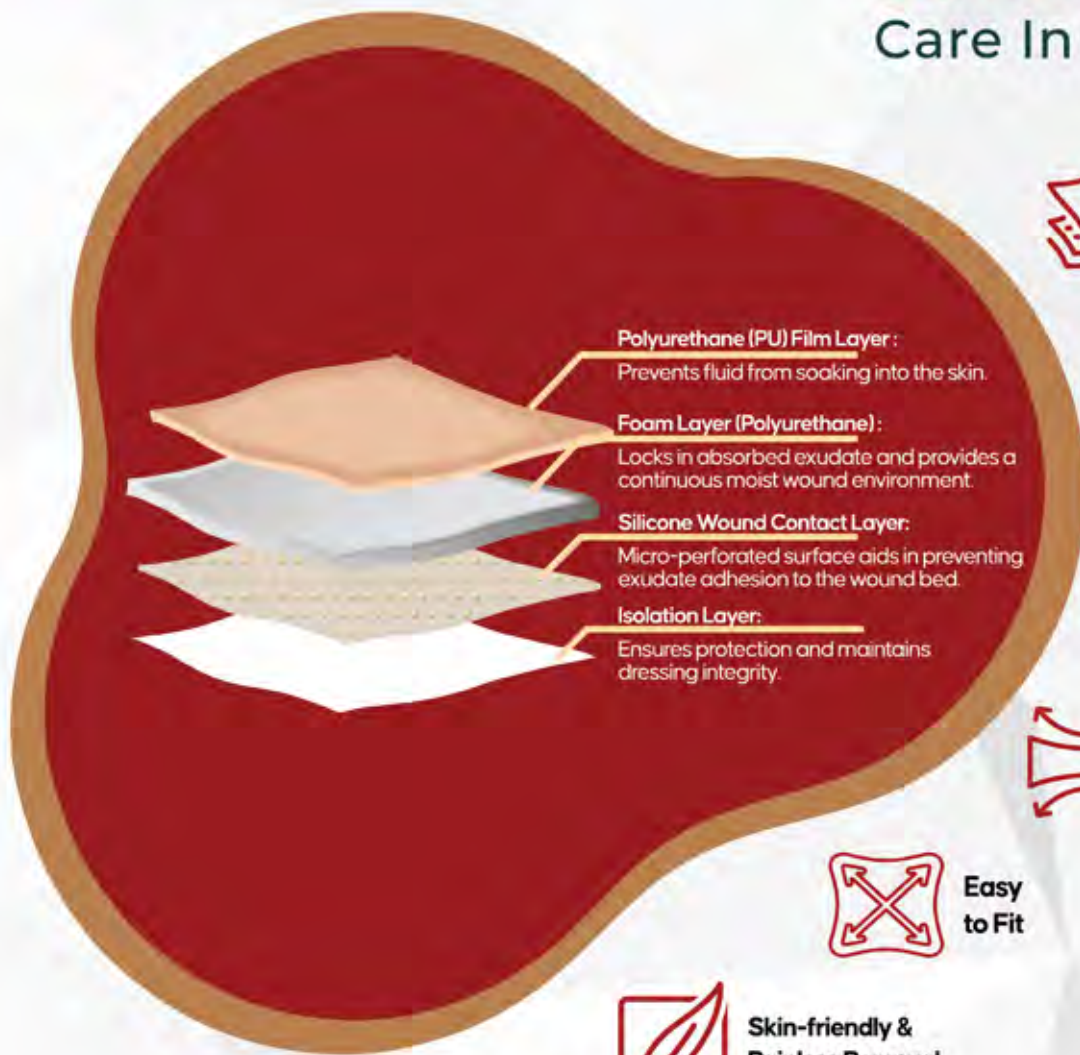

GENTLE ADHESION & PAINLESS REMOVAL

Protects fragile skin from trauma while ensuring easy removal.

A Simple Yet Effective Solution!

HEALING WITHOUT COMPROMISE

Care In Every Layer

Available in All Alpro Pharmacy outlets.

Choose The Right Protection NOW!

Protect your loved ones or patients by implementing a proactive approach to pressure injury prevention. Silicone foam dressings, when used alongside standard care, provide an extra layer of defense, ensuring comfort and skin integrity.

Finally, Diabetes Support That Works

—Proven Effective & Made for You!

In November 2024, the SugO365 team proudly earned recognition as Malaysia's first proven-effective blood glucose subscription program.

SugO365 is more than a test strip subscription—it's a trusted, expert-backed support system with real-time access to pharmacists, nutritionists, and dietitians who support them every step of the way.

In our study with 151 Type 2 diabetes patients with uncontrolled blood glucose:

10.4% Change In HbA1c
Within 6 Months

37.4% Improvement In
Mental Well-Being

Prepared by:
Dr. Khoo Wei Jin

Alpro SugO365 team (name from left):
Taarani, Suet Chen Zeesha, Kai Jia, Wei Jin, Alla

With SugO365, diabetes warriors are never alone.

- ✓ No more second-guessing.
- ✓ No more uncertainty.
- ✓ Just the right support, exactly when they need it most.

Diagnosing Sleep Apnea

Sleep apnea is usually diagnosed with a sleep study, either at home or in a clinic. During the study, doctors check the patient's breathing, blood oxygen levels, and other vital signs to determine if sleep apnea is present and how severe it is.

A Good Night's Sleep:

Your Key to Health

“ SAY GOODBYE TO SNORING! ”

Sleep apnea is manageable. If you have symptoms, reach out for a consultation to explore treatment options. Early diagnosis can prevent complications and improve your quality of life.

Prepared by:
Dr Melissa Goh Kai Sin

Treatment Options for Sleep Apnea

Treatment for sleep apnea depends on its severity and may include:

1 Lifestyle Changes:

Losing weight, eating well, exercising, adjusting sleep positions, and avoiding alcohol and sedatives can help improve symptoms.

2 Continuous Positive Airway Pressure (CPAP) & Bilevel Positive Airway Pressure (BPAP):

These machines deliver a steady flow of air through a mask to keep the airway open. CPAP provides constant pressure, while BPAP has different pressures for breathing in and out.

3 Oral Appliances:

Devices that reposition the jaw or tongue to keep the throat open.

4 Surgery:

In severe cases, surgery may remove tissue blocking the airway or adjust the jaw.

5 Medications and Oxygen Therapy:

These are used for central sleep apnea, especially if there are other health issues.

BiPAP vs. CPAP

Choosing the Right Sleep Therapy for You

	BiPAP (Bilevel Positive Airway Pressure)	CPAP (Continuous Positive Airway Pressure)
Function	Provides two pressure levels: higher for inhalation (IPAP) and lower for exhalation (EPAP).	Delivers continuous airflow at a single pressure.
Comfort	Generally more comfortable for those who struggle with exhalation, mimicking natural breathing patterns.	May be uncomfortable for some users when exhaling against constant pressure.
Cost	Typically ranges from RM4000-9000 due to its advanced and flexible features. (Or rent as low as only RM150/month. Refer to page 54)	Typically ranges from RM1500-RM5000

Consult your healthcare provider to choose the best option for your needs!

- **BiPAP:** Better for complex breathing issues or those needing more comfort.
- **CPAP:** Ideal for straightforward sleep apnea treatment.

protecting your vision: **Age-Related Macular Degeneration (ARMD)**

Safeguard Your Sight Against One of the Leading Causes of Vision Loss

Age-Related Macular Degeneration (ARMD) affects those over 50, leading to **central vision loss**. It occurs when the macula—the part of the retina responsible for sharp vision—**deteriorates**, making tasks like reading and driving difficult.

Types of ARMD

Dry ARMD

The most common form, progressing slowly due to macula thinning.

Wet ARMD

Less common but severe, caused by abnormal blood vessel growth leading to rapid vision loss.

Signs & Risk Factors

- Blurred central vision
- Difficulty in low light
- Genetic predisposition
- Smoking
- High-fat diet

Protect Your Vision Today!

Early detection is key! Book an eye exam at OptiSaver for expert screening and guidance. Keep your vision clear for years to come!
